

**1. Question:** Kartik Poramanik is an inspiration for us. Do you agree? Why/Why not?

Ans: I agree kartik poramanik is an inspiration for us. The reason of this thinking is given below. Tree plantation is very important for us. Every moment we take oxygen from the tree. Without trees we cannot live. If the number of trees is decreasing day by day, it will be difficult to live us, a human being and animal. We depend on trees not only for oxygen. We need trees for many more purposes like food, cloth, house, paper etc. So, everyone should plant trees. So we take inspiration from kartik poramanik.

**2. Question:** Why do you think that that title is appropriate for the story "The Truthful dove"?

Ans: The reason for thinking is that title is appropriate for the story. The truthful dove is given below:

In the story we see that the dove and bat were two friends. For certain reasons they took shelter to an owl. The bat was greedy, so he started to praise owl falsely for eating more food. Actually the owl not good for praise. But the dove was not greedy, he was honest and truthful. He did not praise the owl falsely. He knew if he did not praise the owl, he would be perished for. Still he told the truth, he never praised the owl. For this, he was punished but never told a lie. So we say that the title is appropriate for the story.

**3. Question:** Imagine there is a boat-school in your area to teach river gypsy children. Write a paragraph about how you can help the children with learning.

## **RIVER GYPSIES**

River gypsies are an ethnic group of people in Bangladesh. They are also known as "Bedey" to local people who travel from one place to another. Their main vehicle is the boat to travel. There is a boat school in my area. We try to teach children of the river gypsy. It is very sad that they are deprived of many benefits even though they are citizens of Bangladesh. They are deprived of the light of education as well as civil rights. Only education can give us our civil rights.

So we decided to teach them to read and write. As we have a boat school we go to their family and advise them to bring their children to school. We have some plans for them. We have decided that we will provide them with basic textbooks of school for free. At first you want to teach them the basic of English, mathematics, computer and other available technologies. We can take our laptops and show them what technology can do. We can also teach them about morals and humanity. They deserve the chance to shine in life. So, they need our help and as the conscious citizen of Bangladesh cannot but help them in learning for making a better society.
